

C / C++ DEVELOPMENT

InternCrowd.in

WELCOME TO INTERN CROWD!

- Intern Crowd is an online coding platform that offers specially programming courses for students.
- You've probably heard about how programming shines with new technology. We have to be aware of how programming can initiate new innovations.
- What's a better approach for our students is to grasp and adapt to the technology around them.
- For more details check:- Interncrowd.in

INTERNSHIPS

- Web development
- C/C++
- Cloud Computing
- Android App
- Digital Marketing
- Java Development

- Top 3 Candidate will be decided From your performance and the bumper Task.
- Top 10 Candidates will get Appreciation Letter.
- Top 20 Candidate may get chance to be the Full Time Employee of the InternCrowd.
- Each Candidate will get a Certificate.

**CHEERS TO C/C++
DEVELOPMENT !!!!**

WHAT IS C/C++ DEVELOPMENT ??

- C is one of thousands of programming languages in use today. C has been around for decades and is widely accepted because it offers programmers maximum control and efficiency.
- C++ is an object-oriented computer language developed by renowned computer scientist Bjarne Stroustrup as part of the development of the C language family. It is designed as a cross-platform extension to C to give developers greater control over memory and system resources.
- **Know Your Goals**
- ✓ **Content Is King**
- ✓ **Focus On Your Learning**

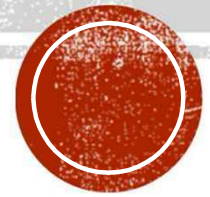

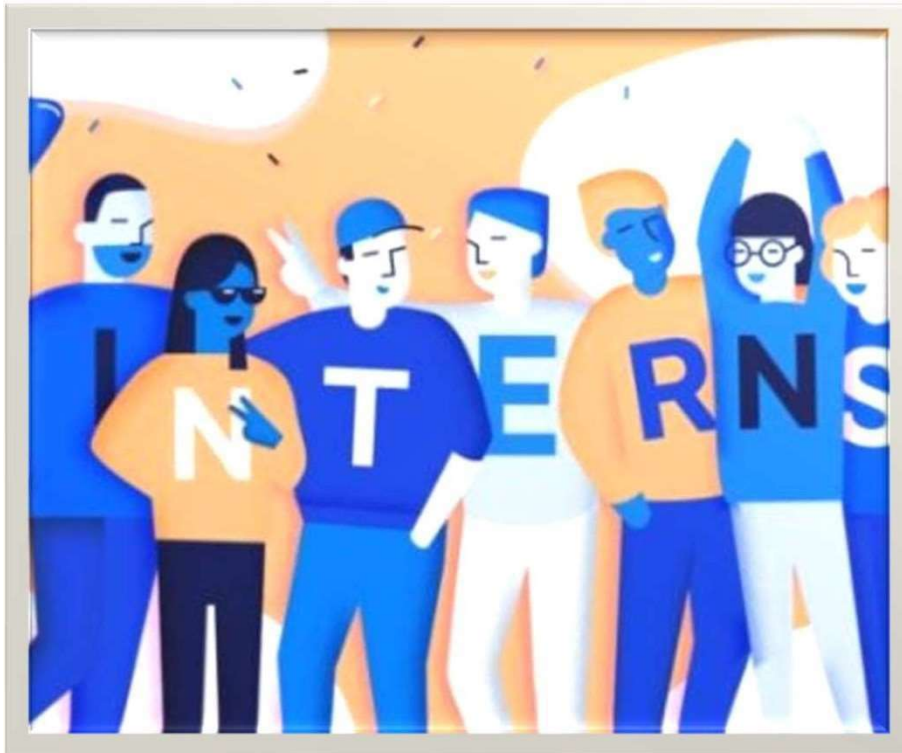

INTERNSHIP SCHEDULE

- 3 Tasks in 4 Weeks

Welcome to Election/Voting 2019

1. Cast the Vote
2. Find Vote Count
3. Find leading Candidate
0. Exit

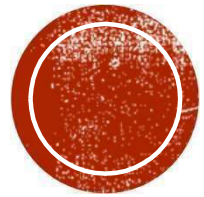

Please enter your choice :
```

TASK -2

A. VOTING SYSTEM

Candidate registration, document verification, auto-generated user IDs, candidate and voter IDs are all part of the online voting system. The Election Commission is in charge of admin login. Adopt Applicant Login. Voters receive a unique her ID and password from each candidate. This allows her to vote for that candidate only once per election. This initiative benefits election commissions, voters (who can learn about a candidate's past and make informed decisions), and the candidate. The software system allows candidates to access their profile and submit all information including previous milestones. Administrators can review each candidate's information and documents. After that, the candidate's girlfriend's ID and password are created and the fake account is deleted. Voters can access the list of candidates in their area through the software her system. Administrators have full control over the system and can regulate and remove information that is not relevant to election rules.

THANK YOU!!
